

Joe Park

Data Analyst

Kirkland, WA • sunghun.josephp@gmail.com • 206-393-7479 • [linkedin.com/in/sunghunp](https://www.linkedin.com/in/sunghunp)

SUMMARY

Data analyst with a Google Data Analytics Professional Certificate and 3+ years partnering across departments in Fortune 500 programs (Meta, Amazon, Google, Microsoft) to turn raw data into actionable insight. Builds Power BI dashboards and SQL-driven reporting from the ground up, prioritizes data integrity and cleanliness, and translates findings into clear, decision-ready recommendations for both technical and non-technical stakeholders.

FEATURED PROJECT

WA State Analyst Compensation Study — Where Should a Company Open a New Office?

2026

- Collected, cleaned, and validated a 7,494-row WA state occupational wage dataset in SQL Server (SSMS), applying a documented data-cleanliness and imputation strategy and checking for outliers and duplicate records to protect data integrity before analysis.
- Identified a data-integrity issue where a statewide total risked being double-counted against individual labor market areas; partnered directly with WA state's Labor Market Information team to validate and resolve it.
- Conducted comparative and trend analysis using SQL (joins, GROUP BY, weighted averages) across 15 Washington labor market areas, translating findings into a clear, decision-ready recommendation on lowest- and highest-cost regions.
- Built a Power BI dashboard from the ground up, including a custom ShapeMap visualization (Census Bureau shapefiles converted via mapshaper.org), a comparison bar chart, and cross-page filters, to make regional wage data accessible to a non-technical audience.

EXPERIENCE

Project Coordinator (Contract, Project-Based)

May 2026 – July 2026

Applause — Bellevue, WA

- Partnered across 6 teams to build an inventory management tracker in Excel, using formulas and pivot tables to verify data accuracy across 150 hardware items.
- Identified a manual-process bottleneck and built a web-based automation tool (HTML, CSS, JavaScript) that cut per-collection time from 30 minutes to 2 minutes across 24 daily collections run by 6 teams, saving roughly 56 hours per week.
- Tracked KPIs in Excel and delivered progress reporting to leadership in PowerPoint for a 12-person team across 108 venues, supporting timely operational decisions.

Data Technician II (Contract)

April 2024 – March 2026

Meta via Qualitest — Redmond, WA

- Authored a project SOP from the ground up, adopted by 6 cross-functional data collection teams across Tokyo, London, and the US, strengthening process consistency and data quality.
- Built an end-to-end reporting pipeline for bug and feature tracking, coordinating 400+ tickets across 10+ stakeholder teams and improving cross-team visibility into data flow.
- Wrote a shell script that automated the data collection setup process, cutting setup time from 5 minutes to about 5 seconds and improving data collection consistency.
- Co-authored and executed a 120-point QA testing plan, partnering across teams to safeguard data accuracy and supporting a 99% accuracy rating on final deliverables.

Graduate Engineer

April 2023 – April 2024

Qualitest — Kirkland, WA

- Reduced project costs by 50% through high-quality, accurate data collection practices.
- Led the end-to-end quality review process for 5+ large-scale projects, partnering with stakeholders to safeguard data accuracy and achieving a 99% accuracy rating on final deliverables.

EDUCATION & CERTIFICATION

Google Data Analytics Professional Certificate

August 2026

SQL, Python, Tableau, and Power BI

Highline College — Associate of Science, Computer Science

March 2020

SKILLS

Core Competencies: Dashboard Development, SQL Querying & Reporting, Data Cleaning & Integrity, KPI Tracking, Ad-Hoc & Trend Analysis, Cross-Functional Stakeholder Partnership

Data Analysis: SQL (T-SQL / SSMS), Data Cleaning & Imputation, Weighted Averages & Aggregation, Outlier & Duplicate Detection

BI & Visualization: Power BI (ShapeMap, Custom Visuals, Filters), Tableau, Excel (Pivot Tables, Formulas)

Geospatial Tools: mapshaper.org, TopoJSON/GeoJSON, U.S. Census Bureau Shapefiles

Other Tools: Google Sheets, Google Docs, PowerPoint, Shell Scripting, HTML/CSS/JavaScript
